The New Way to Age in Place

INTRODUCING

stay HEALTHY

“I want to be assured that my Father is healthy and safe without complicated monitoring or intrusive cameras.”

Enjoy peace of mind with Stay Smart Care HEALTHY!

Finally an aging in place solution that provides a complete picture of your loved one’s health. Unlike trendy watches or devices, Stay Smart Care HEALTHY analyzes health, medical and cognitive data for predictive purposes in order to detect and identify problems earlier—before they become an emergency. This cost-effective and comprehensive solution enables an aging parent to **Stay HEALTHY** and independent in their home while caregivers can **Stay** assured that they have the best care, 24/7.

stay INDEPENDENT

stay ASSURED

- Professionally Installed Sensor Equipment
- Fall Detection Technology
- 24/7 Monitoring & Medical Response
- Mobile App & Alexa Integration

The New Way to Age in Place

Stay Smart Care HEALTHY combines innovative technology with world class health services. Daily blood pressure, pulse, oxygen, temperature and weight are easily measured and collected. Passive sensors provide the highest level of supervision with the least amount of intrusion. A dedicated professional nurse oversees cognitive health and has the ability to dispatch medical support if needed. Clinically accurate, insightful and objective data is shared with the primary care physician between office visits promoting improved quality of care. Plus, it's easy to stay connected with the Stay Smart Care mobile app or Alexa.
